

VITEEGO

MONITOR, PROTECT, AND OPTIMIZE YOUR VINEYARD WITH OUR DRONE & AI SOLUTIONS

Reliable data to guide your every decision

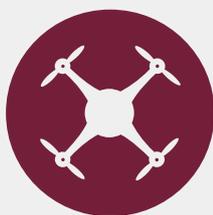

INVENTORY

SURVEYING

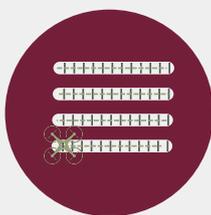

VIGOR ANALYSES

DRONE INVENTORY

Every vine counted, every anomaly detected

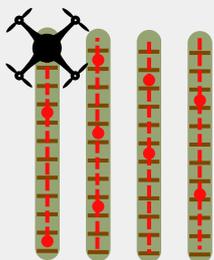

Automatic detection of infertile or missing vines

Row mapping + numbering

Monitoring of replanting & estimated losses

BENEFITS

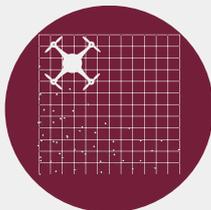

- ✓ 100% of vines analyzed to detect failures.
- ✓ All rows vectorized and numbered for clear monitoring.
- ✓ Up to 20 min/ha to plan replanting and losses.

SURVEYING BY DRONE

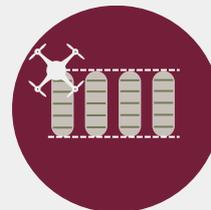

Centimeter precision (± 0.3 cm) to modelize your operation

Centimeter precision for every vine row

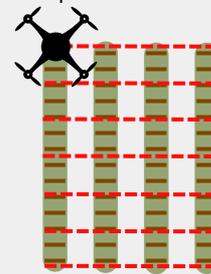

Complete plot modeling with all polygons

Section cutting ensuring precise and automated compliance with NTZs

BENEFITS

- ✓ 25 ha per day.
- ✓ ± 0.3 cm precision across the entire vineyard area.
- ✓ 100% compatible with tractors, robots, and GPS.

FOLIAR VIGOR ANALYSIS

Detect the invisible in your plots to preserve the terroir

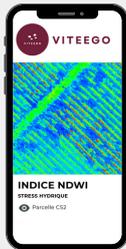

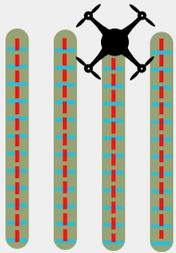

NDVI to differentiate vines and inter-row areas

NDWI to monitor water stress

Seasonal monitoring with multiple flights to observe evolution

BENEFITS

- ✓ High-resolution NDVI for precise analysis.
- ✓ Detection of variations in vigor and water stress.
- ✓ Optimization and control of your yields.

AI AND DRONES SERVING VITICULTURE

VITEEGO, the viticulture subsidiary of AGREEGO, combines agronomic expertise with aerial mapping technologies.

We offer winegrowers precise tools to understand the health of their plots and secure the future of their harvests.

In 2024, more than 2 000 ha were surveyed thanks to our surveying, inventory, and foliar vigor analysis services, all aimed at preserving the identity of each terroir.

Under AGREEGO LAB, we are developing innovative solutions integrating AI for the automated detection of diseases, enabling targeted treatment.
